

Proudly Made in the U.S.A.  Patent Pending

**WARNING! Don't apply The Gameface™ if you have latex allergies or reactions to bandage adhesives.
Not recommended for children under 4 years.**

HOW TO "PUT YOUR GAMEFACE ON"!

Before applying The Gameface™, be sure you have the necessary items and tools and to set aside the appropriate amount of time for the application process. Once you begin there is no starting over. If you have applied a temporary tattoo before the process is the same just on a larger scale.

If you wish to trim The Gameface™ for a more custom fit, you will need a pair of sharp scissors. The Gameface™ does not adhere well to facial hair (beards, goatees, mustaches etc.) so you will need to trim The Gameface™ accordingly so as not to touch your facial hair.

1. Start with a clean, dry face. (If your skin is wet, The Gameface™ will not adhere as well.)

2. Tear away the perforated header card.

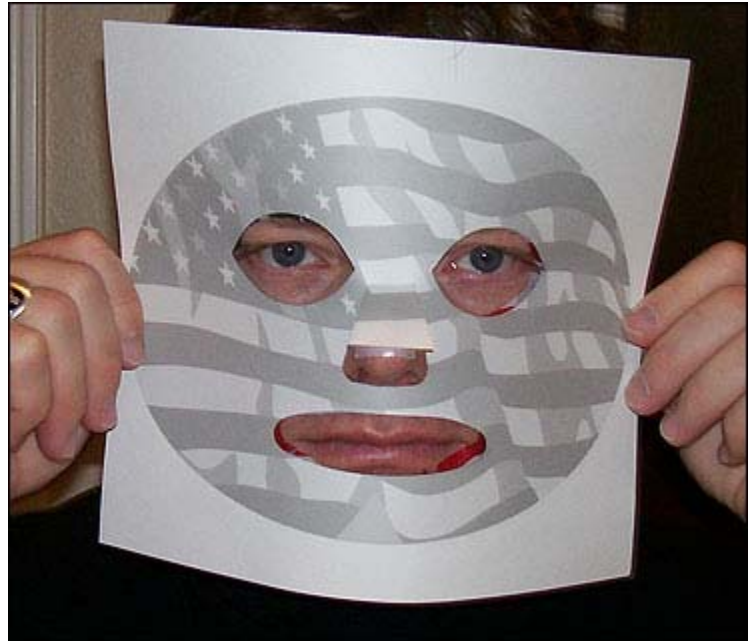

3. Remove the plastic covering from The Gameface™.

4. Place The Gameface™ carefully on a dry face, centering the nose flap on nose.

5. Using the wet (but not dripping) washcloth or paper towel, press The Gameface™ onto center of the face working towards the outer edges of the face wetting the paper backing completely. Be patient.

6. Once the paper backing is saturated and separates from The Gameface™, carefully pull the paper backing away, starting at one side and working your way across the face. The paper backing will easily slide away if it is properly saturated.

If the backing sticks to the design and wants to not “let go”, press backing sheet down and apply more washcloth then try to remove backing again.

7. Once the backing has been removed, dampen your finger and pat down bubbled and/or loose areas.

NOTE: Always use a damp finger so The Gameface™ will adhere to the face and not to a dry finger. Not using a damp finger may result in damaging the design or the design sticking to the finger and not the face.

At first, The Gameface™ will feel taught as it adheres to your face, but after a while, it will feel comfortable - just like a layer of skin. Don't forget you have it on!

REMOVING YOUR GAMEFACE

Wash the face with warm soapy water. Use a washcloth and/or fingers to gently rub tattoo away.

For remaining tattoo material, saturate tattoo with household rubbing alcohol or baby oil, wait 30 seconds, then rub away tattoo with cotton ball. **OR**, lift tattoo from dry skin using several pieces of transparent household tape.

CAUTION: When using rubbing alcohol or baby oil be careful around the eye areas.
